

STRESS TUB.

— FOR ALL CLASSES OF BEEF CATTLE —

THE CONVENIENT CHOICE FOR WHAT YOUR CATTLE NEED

Purina® Stress Tub is a free choice supplement designed for young cattle prior to or after stress and breeding animals. This product is recommended for use in pre-weaning situations, receiving and hospital pens, as well as to the breeding herd 60 days prior to calving and through the breeding season.

FEATURE

BENEFIT

Low moisture cooked molasses product technology

Consistent intake and nutrient delivery that helps eliminate over-consumption. Moisture from air and saliva from licking softens a thin layer on the surface of the tub. Lower levels remain protected and solid. Intake is regulated by availability to softened layer

Supplement delivery method that fits a variety of production systems

Convenient supplement delivery system is ideal for small beef producers with other time commitments, as well as large producers who experience time and labor shortages

Natural protein (from vegetable sources only)

Supplies modest amounts of protein to maximize animal performance at an economical cost

Specifically designed to improve overall health and performance of newly received stressed cattle; Also formulated to provide elevated levels of vitamins, specifically Vitamins A and E. In cows, improves reproductive efficiency through improved fertility; improves life-time performance through the positive impact on fetal development; improves overall performance through improved immunity, hoof health and disease prevention. Meets 100% of trace minerals requirements using Zinpro's Availa®4 complexed trace minerals at a 0.5 lb consumption

Higher copper (785 ppm) and zinc (2500 ppm) levels

For areas with chronic copper deficiencies or areas with copper antagonists (high environmental molybdenum, sulfur or iron), while still maintaining the proper Zinc:Copper ratio

60 lb Non-Returnable Plastic Container

Labor saving supplement delivery system that aims to reduce the biosecurity risks associated with returnable containers

Better palatability helps maintain consistent feed intake Better feed digestibility helps make more nutrients available to the animal for absorption, performance, health and production

Non-returnable biodegradable fiber container. Non-returnable plastic container also available

Labor saving supplement delivery system that reduces the biosecurity risks associated with returnable containers

See the Difference

- Purina® Stress Tub is the convenient choice prior to or after stress, including breeding and show animals
- Designed for operations of any size with 225 lb. tub and a 60 lb. tub + cover options available

Feeding Directions

Purina® Stress Tub is a highly palatable molasses based supplement that entices cattle to taste. It provides the key nutrients needed for a fully functioning immune system so that cattle are fully prepared to face and/or recover from the stresses of weaning and transportation, respond to vaccination programs, start more quickly on feed or return to their home pen more quickly. It also provides key nutrients involved in reproductive performance to positively impact fertility, estrus, as well as semen quality and quantity.

Receiving, Starting and Show Cattle Supplement

Offer Purina® Stress Tubs to newly received calves or show cattle. Tubs should be offered through the first 3 to 4 weeks to newly received calves and throughout the feeding period for show cattle. Feed at the rate of 1 tub per 5 to 15 head of cattle, with a minimum of 2 tubs in each pasture to assure that smaller, more timid cattle get their share. Place tubs in dry areas where cattle congregate, loaf, feed and water. Purina® Stress Tubs are an excellent supplement to include in the diet to help stimulate feed intake and provide important nutrition to help cattle overcome stress.
